

# SUPPORTING DOCUMENT REGARDING BY-LAWS 526.19.1-2025 AND 526.19.2-2025

---

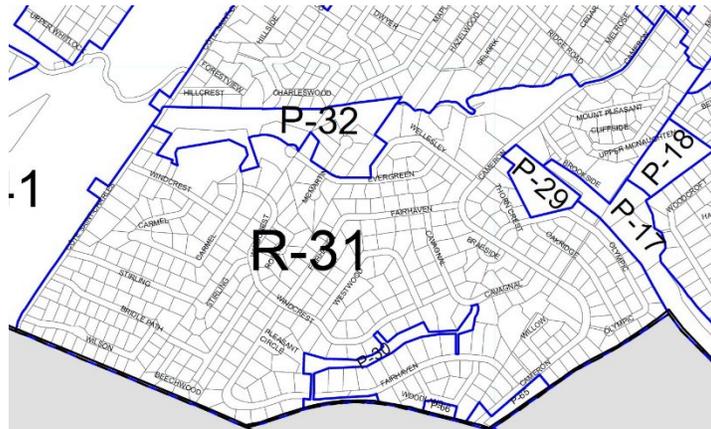

On August 4, 2025, Councillor Douglas Smith formally introduced By-Law 526.19-2025 *amending Zoning By-Law 526 in order to modify the provisions related to air conditioning units and heat pumps*, and Council approved a draft version at that meeting.

A public consultation on the draft by-law was held on August 14, 2025, allowing residents to learn more and share their comments.

Because this by-law is subject to approval by referendum, and because a request to open a referendum register was received for **Zone R-31**, the by-law must follow the referendum process.

For this reason, the original draft by-law will be divided into two separate draft by-laws;

1. **By-Law 526.19.1-2025** to amend the Zoning By-Law in order to modify the provisions related to air conditioning units and heat pumps in zone R-31. This draft By-Law **is subject** to the process of approval by way of referendum.

2. **By-Law 526.19.2-2025** to amend the Zoning By-Law in order to modify the provisions related to air conditioning units and heat pumps. This draft by-law is **not** subject to approval by referendum, as no requests to open a referendum register were received from any other zones.
